

# Biodiversity Sharing & Disseminating Seminar: Tools & Knowledge for Biodiversity Management

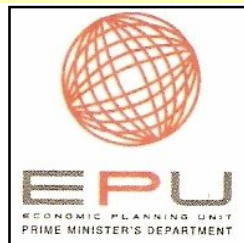

Le Meridien Hotel, Sabah

17 November 2009 (Tuesday) Time: 8.30 a.m.—5.00 p.m.

The Ministry of Natural Resources and Environment (NRE), the Environment and Natural Resources Section (ENRES) of Economic Planning Unit as well as the Malaysian Environmental Non Governmental Organisations (MENGO) has over the past three years worked with a project to identify and explore how biodiversity and its value can be better mainstreamed throughout the society. The project has been generously supported by the Danish Government under the overall Environmental Programme Cooperation of the two Governments.

The Ministry of Natural Resources and Environment sees it as an important task to ensure that the information from the project is made available to key stakeholders at all levels and would therefore like to invite you for this seminar titled "Tools and Knowledge for Biodiversity Management".

*All are cordially invited. For further information, please contact us*
